EXPERIENCE:

WISE Cities

UX Designer / Researcher (Volunteer)

June 2022-Present

- Develop wireframes and prototypes in Figma of the administrative dashboard used to track app usage analytics.
- Participate in the usability design and QA testing of both the web and mobile versions of the organization's senior-oriented application.
- Collaborate with product team to plan and facilitate user interviews, testing, and focus groups at various senior centers in D.C. and Virginia.
- Grow company network through outreach to over 50 senior and community centers to increase research participants.
- Work in an agile-focused environment to meet team deliverables and discuss progress through stand-ups.

College Success Scholars

Program Coordinator (Graduate Assistant)

May 2022 – Present

- Promote diversity and inclusion by assisting over 150 Black and Latino young men with the transition to college and the professional world through networking, internships, and research.
- Personally guide and mentor a group of 5 students with low GPA's and check in on their progress weekly.
- Manage a team dedicated to providing internship/research opportunities to students through job boards, outreach, blog management, and data analysis.
- Increased the internship/research acquisition rate of program students by 10% in the 2022-2023 school year.
- Ensure students fulfill program requirements and leadership team collects/inputs data accordingly across four departments.

UnitedHealth Group

Information Technology Intern

June 2021-August 2021

- Worked with a team to apply user-centered design concepts to expand the company's online presence through social media platforms that provide engaging, accurate, and accessible healthcare information to users.
- Conducted primary and secondary user research to identify user and business needs.
- Used Figma to develop wireframes and create high-fidelity prototypes for Facebook, YouTube, and TikTok platforms.

University of Maryland, College Park

Academic Peer Mentor

August 2020 - December 2020

- Peer mentor for an Object-Oriented Programming course taught using Python over the course of 4 months.
- As a part of the instructional team, assisted 51 students and reviewed code for weekly exercises during designated office hours.
- Met one-on-one with students to tutor them with any concepts they needed help with.
